

User Manual: DTI Performance Tracker

1. Introduction

The **DTI Performance Tracker Dashboard** is a professional web application designed for the **Department of Trade and Industry (DTI) - Nueva Vizcaya**. It simplifies the reporting, tracking, and visualization of organizational performance metrics through interactive dashboards.

Core Modules:

- OORC (Organizational Outcomes & Report Cards):** Tracks high-level organizational goals and performance indicators.
- PGS (Performance Governance System):** Monitors strategic measures and scorecards.
- Admin Management:** A secure portal for administrators to update system data using Excel files.

2. Using the Dashboard (Public View)

The dashboard provides a transparent view of the organization's progress. No login is required for general viewing.

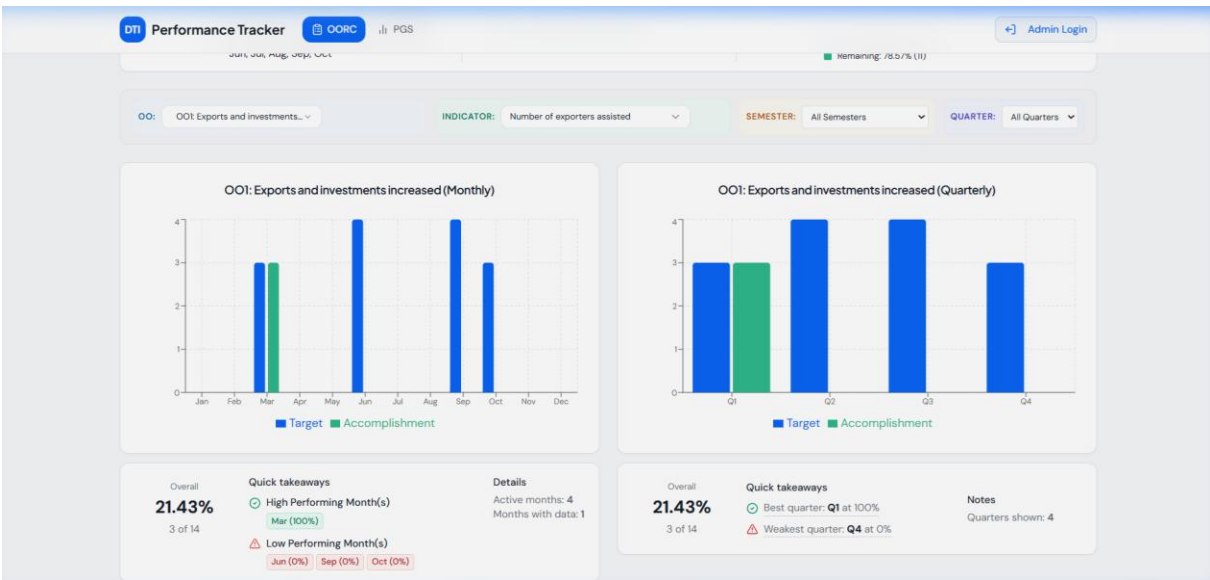

OORC Dashboard Overview

The OORC section provides deep insights into Organizational Outcomes and Performance Indicators (PIs). “Hover to text and click on dotted lines for additional information.”

OORC Dashboard Visualizations

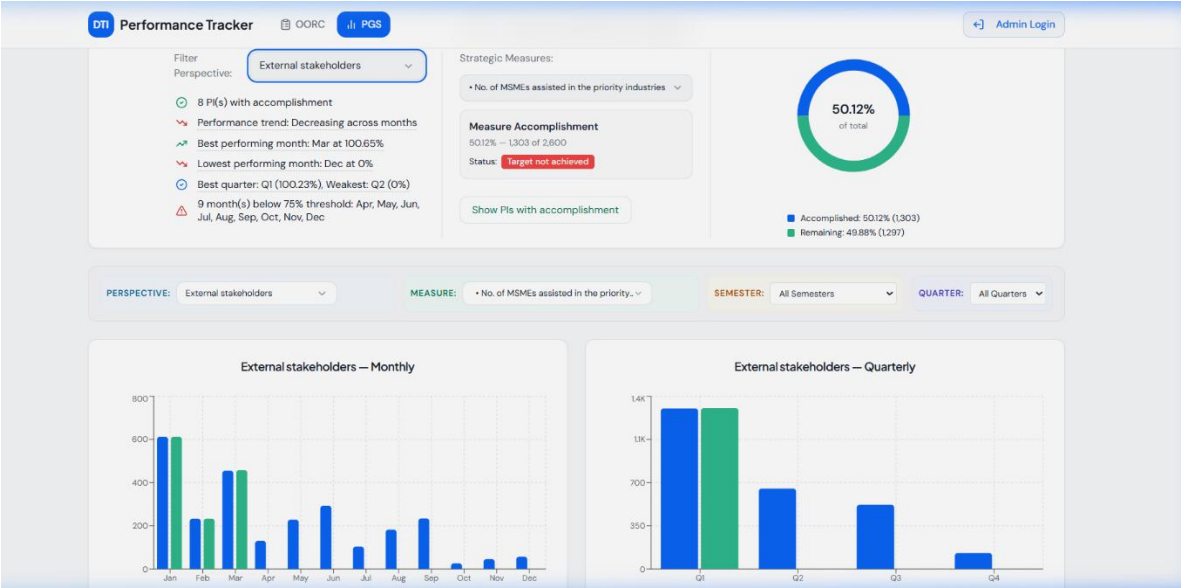

Detailed monthly and quarterly charts help track the progress of each indicator against its target. “Hover to text and click on dotted lines for additional information.”

PGS Dashboard Overview

The PGS section focuses on Strategic Perspectives and measures defined in the scorecard. *“Hover to text and click on dotted lines for additional information.”*

PGS Dashboard Visualizations

Similar to OORC, the PGS module provides bar charts for comparing targets vs accomplishments over time. *“Hover to text and click on dotted lines for additional information.”*

Managing Data Uploads:

Once logged in, administrators have access to the **Uploads** section where they can manage Excel files.

The administrators can perform specific actions for each file using the controls located on the right side of every row.

- **Download:** Click the blue button to save a copy of the spreadsheet to your personal computer.
- **Edit:** Click the button to modify the properties or details of the selected entry.
- **Delete:** Click the red button to completely remove the file from the database.

IMPORTANT

Please use caution as this action might be permanent.

4. Troubleshooting & FAQ

Q: Why is my uploaded data not showing on the dashboard?

A: Verify the standardize Excel file for OORC and PGS. Ensure that the columns on both files are correct, and no additional columns were added. Ensure that there are data in cells of strategic measure and performance indicator of the Excel file, otherwise it will not display or reflect in the dashboard.

Q: Can I delete an accidental upload?

A: Yes. Navigate to the **Uploads** page, find the file in the list, and click the **Delete** button. This will remove the record from both the database and the storage.

Q: Can I add rows in Excel file?

A: Yes. Adding rows for strategic measure and performance indicator are possible, however, it might require a “formula” (ex., =N11/F11, =N8/F8). Merged cells or manually inputted values might not be displayed.

IMPORTANT

Make sure to remove unnecessary or duplicated files to ensure that the web application performs at its best in the long run.
